

Create cloudant DB

1) Register and Login to Cloud

Registering in cloud using <https://cloud.ibm.com/registration>

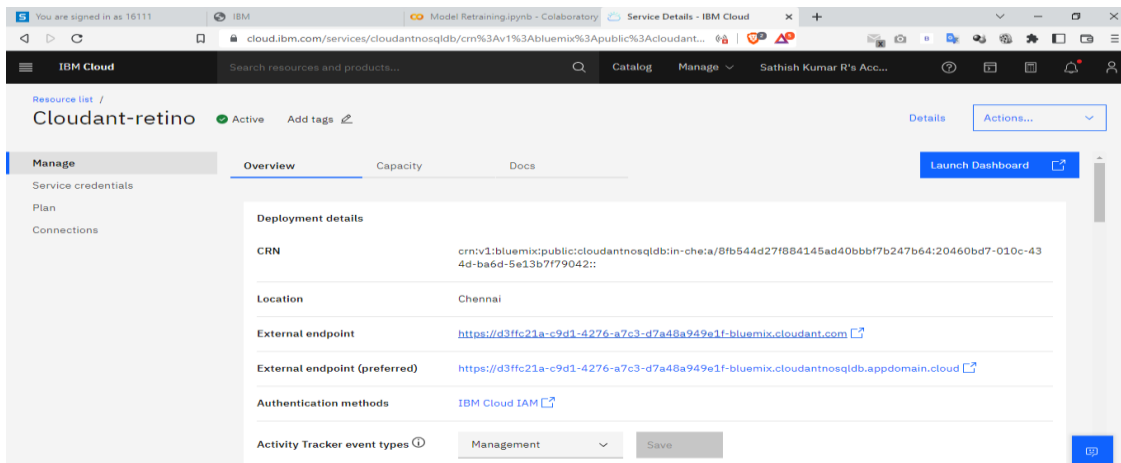

Sign in to cloud

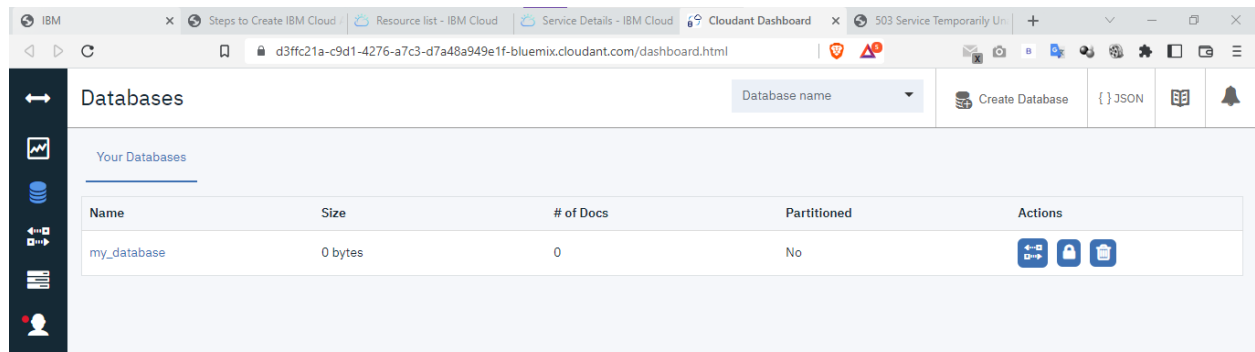

2) Create service instance

From the resource list the new database has been created as a cloud instance

3) Now going to dashboard shows the databases created

The screenshot shows the IBM Cloudant Databases dashboard in a web browser. The browser's address bar displays the URL: `d3ffc21a-c9d1-4276-a7c3-d7a48a949e1f-bluemix.cloudant.com/dashboard.html`. The dashboard has a dark sidebar on the left with icons for navigation. The main content area is titled "Databases" and includes a search bar labeled "Database name". Below the search bar, there is a section titled "Your Databases" which contains a table. The table has five columns: "Name", "Size", "# of Docs", "Partitioned", and "Actions". A single database entry, "my_database", is listed in the table. The "Size" is "0 bytes", the "# of Docs" is "0", and "Partitioned" is "No". The "Actions" column for this entry contains three icons: a blue square with a white double-headed arrow, a blue square with a white lock, and a blue square with a white document icon. To the right of the table, there are buttons for "Create Database", a JSON icon, a document icon, and a bell icon.

Name	Size	# of Docs	Partitioned	Actions
my_database	0 bytes	0	No
